To Whom It May Concern:

It is a privilege to write a letter of recommendation for Anna Przybylski. She is one of the most outstanding students I have ever had the pleasure to teach.

Anna was my student in "Communications Skills for Teachers," an undergraduate course that includes instructions in public speaking, professional writing, and parent conferencing skills. Anna did outstanding work in all three areas. This past fall Anna was again my student in a five week graduate level seminar that begins "Secondary Methods II," a course that takes students planning to teach on the secondary level into public school classrooms to observe and teach lessons in their content areas. Again in this course, Anna's work was outstanding. She is creative, perceptive, has a fine work ethic and high integrity. Anna's communication skills, both oral and written, are excellent. She has a true love for the study of mathematics that I have no doubt will infect the students she teaches. Anna Przybylski is a delightful young woman who will grace any faculty of which she is a part.

I can think of not one negative thing about Anna. If I had children who were in secondary level mathematics classes, I would want them to be in Ms. Przybylski's class. People can learn to become good teachers, but some people, in my opinion, are born with a special gift that makes them the best teachers. Anna has that gift. She will be an outstanding teacher.

If I can be of any further assistance to you while you consider Anna's candidacy for employment, please contact me at 610-929-1221 or at [richardsonmk@aol.com](mailto:richardsonmk@aol.com).

Sincerely,

A handwritten signature in black ink that reads "Martha K. Richardson".

Martha K. Richardson

Adjunct lecturer – Education Department
